The Frame Shop — Your Demo & Trial Packet

Sep 30, 2026 · @Otis Williams

Paul, your new website is ready for you to try. This packet has everything in one place: a working demo you can click through today, what to try first, and the documents for getting it live.

Open the demo

Demo: frameshop-demo.vercel.app

- It opens straight to the website on your phone or a computer. No account or sign-in needed.
- **Your owner PIN for the demo comes in a separate text from Otis.** It's kept off this page on purpose. On the real site you'll choose your own.
- It's a practice copy. What you type is saved only on the device you're using: no customer sees it, no card is charged, nothing is emailed, and you can't break anything.
- To start fresh, tap **Reset** on the orange "Demo" bar in the bottom corner.

What to try (about 15 minutes)

1. **Book a job as a customer.** Tap **Book Inspection**, fill it in with your own bike, and note the ticket number you're given.
2. **Track it.** Tap **Track Ticket** (**Tracker** at the bottom on a phone) and enter that number. You'll see the job's status.
3. **Open your Command Center.** Scroll to the bottom of the page, tap **Owner Login** and enter the PIN from Otis's text. Your test booking is under **Work Orders**.
4. **Move the job along.** Tap **Confirm Lift**, then **In Shop**, then **Mark Completed**. Check the tracker again and it has moved with you.
5. **Invoice it.** Tap **Create Owner Invoice**, add a part or some labor, and save. Then:
   - **Download PDF** gives you the invoice your customer would get.
   - **Record payment** with a cash amount, and watch the balance drop.
   - **Excel** saves a spreadsheet copy (optional; you never need Excel to invoice).
   - Downloads ask you to confirm before saving.
6. **Check your prices.** Open **My Rates**. Invoices start from these prices, so tell Otis anything that's wrong.
7. **Try the marketing assistant.** Open **Marketing**, tap **Run an assistant**, then **Run** on the Content planner. The demo shows sample posts. Tap **Preview on phone** and add a photo from your phone to see how the post will look.
8. **Look at your photos and help. Owner Photo Control** is where you change the site's pictures and add videos. **How Do I…?** has step-by-step help for everything.

What only works on the live site

These need the shop's own accounts, which we set up together in step 1 of the handoff plan:

- **Card payments:** the $75 deposit and invoice pay links, through your Shopify store.
- **Emailing:** invoice PDFs to customers, and your morning summary email.
- **The marketing assistant writing for real:** from your actual jobs and notes. The demo shows samples.
- **The "what's wrong with my bike?" AI assistant.**
- **Everyone seeing your changes.** In the demo, your photos, videos and jobs stay on your own device. On the live site, every visitor sees them.

Your documents and what happens next

- **Handoff Plan** (attached PDF)**:** what you're getting, the four steps to launch, and what we need from you. Start here.
- **Your Photos & Videos** (attached PDF)**:** how to put your own pictures and videos on the site.
- **Trial Checklist** (attached PDF)**:** for later, once the site is on its real address with your accounts connected. Everything on it works then; some of it can't work in the demo.

Next step: after you've tried the demo, send Otis anything that doesn't look or work the way the shop runs. Then book an hour together to set up the shop's accounts (step 1 of the handoff plan).
